DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims (1-6), (7 and 20), (8-10 and 21), (11-14 and 22), (15, 16 and 23) and (18 and 25) drawn to a hub for combined circuit and packet switching, classified in class 370, subclass 352. The examiner notes that the systems in this subclass often times mentions encryption in order to protect sensitive data.
 - II. Claims (17 and 24) drawn to tracking communication line usage, classified in class 370, subclass 252.
 - III. Claims (19 and 26), drawn to network configuration determination, classified in class 370, subclass 254.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as routing circuit switched data over a packet network in order to provide audio/video communication. Invention II has separate utility such as determining the communication parameters in order to reduce the cost of communication. Invention III has separate utility such as automatic configuration of plug and play devices on a network. See MPEP § 806.05(d).

Art Unit: 2662

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

5. A telephone call was attempted to request an oral election to the above restriction requirement, but did not result in an election being made. The assigned attorney, Richard Johnson, could not be reached at the telephone number in the file. No new number was provided along with the change of address correspondence.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Marcelo whose telephone number is 571-272-3125. The examiner can normally be reached on Mon-Fri 8:30-5:00.
